

NUTRITION

The numbers

DAILY CALORIES

2,200

a small deficit

PROTEIN

160 g

every day

CARBS

230 g

more on long days

FAT

70 g

keep it above 60

WHY THESE NUMBERS

Protein is high on purpose. In a deficit it protects muscle.
Hit protein and total calories first.

The day

MEAL 1 · BREAKFAST

Oats and eggs

- 3 whole eggs, cooked in 1 tsp olive oil
- 60 g oats
- 1 banana (optional)

35P / 60C / 18F ≈ 520 kcal

MEAL 2 · AT WORK

Chicken and rice

- 200 g chicken breast, weighed raw
- 180 g cooked rice or two slices whole grain bread
- A large serving of vegetables

50P / 60C / 15F ≈ 600 kcal

SNACK · AFTERNOON

In your bag

- 170 g Greek yogurt
- 20 g almonds

25P / 30C / 14F ≈ 340 kcal

MEAL 3 · DINNER

Fish and potatoes

- 200 g fish (cod, salmon) or lean beef
- One medium sweet potato

45P / 50C / 15F ≈ 520 kcal

WATER

2.5 to 3 litres a day. Keep a bottle on your desk.

DAILY TOTAL

Four meals as written: roughly 155 g protein and 2,000 calories.

The ones that matter

SUPPLEMENT	DOSE	WHEN	NOTE
Creatine	5 g	Any time, daily	No loading needed
Vitamin D3	1,000-2,000 IU	With a fatty meal	Take alongside K2
Magnesium	200-400 mg	Before bed	Glycinate or citrate
Zinc	15 mg	With food	Not with calcium

STEPS

8-10k

every day
